

# **General Hospital – Department of Internal Medicine**

To whom it may concern,

We herewith discharge Mr. Liam O'Connor, born on 1981-09-18 (record number 662845). He was hospitalized until 2025-10-01 for evaluation and management of chronic medical conditions.

## **Hospital Course**

During the stay, the patient's known history of hypertension and type 2 diabetes mellitus was re-evaluated. Blood pressure control required continuation of Amlodipine, and diabetes management with Metformin was maintained. A chest X-ray was performed (Chest X-ray (no acute findings)), showing no acute pathology. Overall, the patient remained stable and responded well to therapy adjustments.

## Laboratory Findings

Test	Result
HbA1c	7.4 %
Fasting Glucose	142 mg/dL
Creatinine	0.9 mg/dL

## Prescriptions at Discharge

- Metformin 500 mg BID
- Amlodipine 5 mg QD

## Summary and Follow-up

The patient has been discharged in stable condition. Continued outpatient management of hypertension and diabetes is required. A follow-up appointment is scheduled in 8 weeks. Lifestyle modifications, including diet and physical activity, were reinforced.
