Discharge Summary

Patient: Edeltraud Richter

Date of Birth: 04/06/1949

Admission Date: 09/15/2025

Discharge Date: 09/22/2025

Attending Physician: Dr. Ingrid Vogt, MD

Ms. Edeltraud Richter, DOB 04/06/1949, was admitted on 09/15/2025 with paroxysmal atrial fibrillation with rapid ventricular response (HR 142 bpm). AF onset well documented at under 6 hours.

Primary Diagnosis: Paroxysmal atrial fibrillation (I48.0)

Rate control achieved with IV metoprolol. Electrical cardioversion under sedation — sinus rhythm restored on first attempt. Echo prior to cardioversion: no intracardiac thrombus, EF 58%.

Apixaban 5 mg twice daily initiated — CHA2DS2-VASc score 4. HbA1c 6.6% — diabetes management reviewed and found adequate on diet alone.

Ms. Richter has hypertension on amlodipine and perindopril. Retired nurse, non-smoker.

Medication at discharge: Apixaban 5 mg twice daily, amlodipine 5 mg, perindopril 5 mg, bisoprolol 2.5 mg. Follow-up: Cardiology in 6 weeks.

Dr. Ingrid Vogt, MD

Senior Cardiologist
