
Discharge Summary

Patient: Gerhard Fischer

Date of Birth: 01/11/1947

Admission Date: 06/03/2024

Discharge Date: 06/14/2024

Attending Physician: Dr. Ralf Schneider, MD

Mr. Gerhard Fischer was admitted on 06/03/2024 with worsening dyspnea and increased sputum production consistent with an acute exacerbation of COPD. He has GOLD stage 3 COPD on tiotropium and formoterol.

Primary Diagnosis: Severe chronic obstructive pulmonary disease (J44.1)

An HbA1c of 6.8% was found during the workup, leading to a new diagnosis of type 2 diabetes. Fasting glucose on two occasions was 128 and 134 mg/dL.

IV methylprednisolone tapered to oral, nebulized bronchodilators given, and amoxicillin-clavulanate for 7 days. Sputum grew *H. influenzae* — sensitive.

Mr. Fischer has a 40 pack-year history, cessation 2015. Lives alone with twice-weekly home care. Daughter informed of new diabetes diagnosis.

Discharged June 14, 2024. Diabetology referral, repeat spirometry in 8 weeks, and pulmonary rehabilitation recommended.

Dr. Ralf Schneider, MD

Senior Physician, Pulmonology
