

Discharge Summary

Patient:	Ursula Zimmermann
Date of Birth:	11/30/1949
Admission Date:	08/19/2024
Discharge Date:	08/28/2024
Attending Physician:	Dr. Sabine Koch, MD

Ms. Ursula Zimmermann, DOB 11/30/1949, was admitted August 19–28, 2024 for evaluation and treatment planning following diagnosis of gastric carcinoma. Upper GI endoscopy revealed a 4.2 cm ulcerated antral lesion. CT: perigastric lymph node involvement.

Primary Diagnosis: Gastric carcinoma (C16.9) — Tumor staging: T3 N1 M0

HbA1c	6.4%
CA 19-9	234 U/mL
Albumin	3.2 g/dL

Ms. Zimmermann has mild type 2 diabetes managed with diet (HbA1c 6.4%). History of H. pylori eradication 2015. Former smoker, 15 pack-years, cessation 2008.

MDT decision: perioperative FLOT chemotherapy followed by curative gastrectomy. Nutritional assessment revealed mild malnutrition — high-calorie supplementation and dietitian referral arranged. Chemotherapy team appointment made.
