Discharge Letter

Patient:	Bernhard Klein
Date of Birth:	03/05/1955
Admission Date:	09/02/2024
Discharge Date:	09/09/2024
Attending Physician:	Dr. Michael Schwarz, MD

Mr. Bernhard Klein, DOB 03/05/1955, was admitted following a generalized tonic-clonic seizure. He has focal epilepsy secondary to a right temporal cavernoma, previously well controlled on levetiracetam 1000 mg twice daily; had missed several doses the preceding week.

Primary Diagnosis: Epilepsy, not otherwise specified (G40.9)

EEG showed right temporal slowing; MRI brain unchanged. Levetiracetam increased to 1500 mg twice daily. Driving restrictions reinforced. Discharged 09/09/2024. Neurology outpatient in 6 weeks.
