90 River Road, Raleigh, NC 27601

Patient: Karl-Heinz Möller**Date of Birth:** 02/12/1953**Admission Date:** 03/03/2025**Discharge Date:** 03/10/2025**Attending Physician:** Dr. Thomas Kruse, MD

Discharge Summary

Mr. Karl-Heinz Möller, DOB 02/12/1953, was admitted with a 10-day history of worsening abdominal cramping and diarrhea (10 stools per day) consistent with an acute severe flare of Crohn's disease. He has ileocolonic Crohn's since 2009.

Primary Diagnosis: Crohn's disease (K50.9)

IV hydrocortisone initiated; CRP improved from 148 to 42 mg/L. Colonoscopy: active ileocolonic disease, no abscess. IBD MDT approved switch to adalimumab — first dose given day 6. Discharged 03/10/2025 on prednisolone taper.

Dr. Thomas Kruse, MD
