Discharge Letter

Patient:	Rudolf Wagner
Date of Birth:	01/17/1945
Admission Date:	08/18/2025
Discharge Date:	08/25/2025
Attending Physician:	Dr. Elisabeth Fuchs, MD

Mr. Rudolf Wagner, DOB 01/17/1945, was admitted with an acute polyarticular gout flare affecting the right first MTP, right ankle, and left knee. Serum urate 9.8 mg/dL. Joint aspiration confirmed monosodium urate crystals.

Primary Diagnosis: Gout (M10.9)

IV methylprednisolone given (colchicine precluded by stage 3a CKD). Oral prednisolone taper at discharge. Urate-lowering therapy with febuxostat initiated. Dietary advice on purines and alcohol provided. Discharged 08/25/2025. Rheumatology in 4 weeks.
